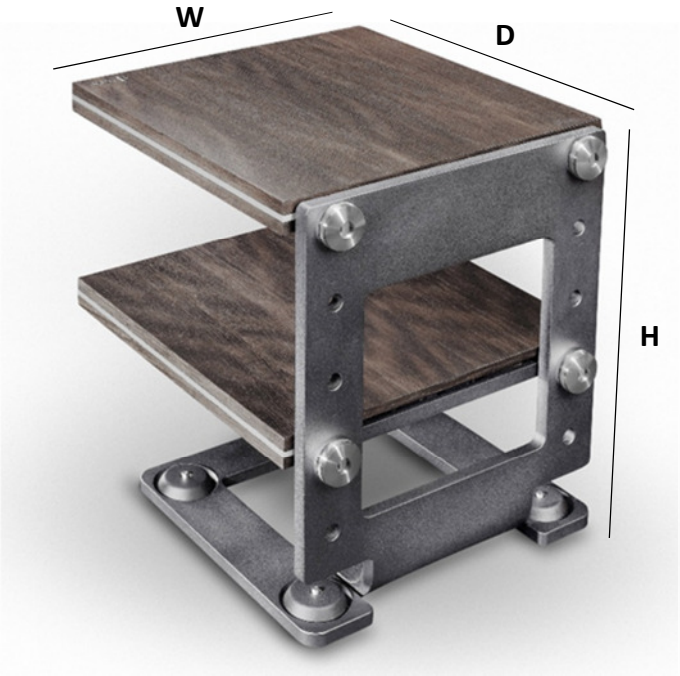
PROTO



PROTO's audio furniture philosophy is conceivably easy. Complete decoupling via the sub chassis construction whilst simultaneously realizing maximum component and functional integration. Admittedly realization is complex. The numerically optimized one-piece steel frame construction of the base element, the height-adjustable shelf-supports with adaptable three-point support and the bamboo composite plate elements with their precious wood veneer, form the overall concept of Hifi- audio furniture with incomparable features. Perfect workmanship is a granted. After an optimization process over several years this audio furniture has now developed to become one of the most preferred pieces of equipment and visual objects of renowned high-end manufacturers.

	Weight	Hight H	Width W	Depth D
Base Element	41,2 kg	56,5 cm	47,0 cm	39,0 cm
Shelf Support	4,4 kg	4,5 cm	39,5 cm	50,0 cm
Shelf	6,7 kg	4,0 cm	50,0 cm	50,0 cm
PROTO (incl. 2 shelves)	**63,4 kg**	**56,5 cm**	**50,0 cm**	**55,0 cm**
Shelf Capacity (vertical)		50 kg		

Sub-Chassis with inverse three-point support & polymer inlays, vibration absorbers, grid:100 mm
